**Logic Design of NanoICS (Nano- and Microscience, Engineering, Technology and Medicine)** Svetlana N. Yanushkevich, Vlad P. Shmerko, Sergey Edward Lyshevski

Today's engineers will confront the challenge of a new computing paradigm, relying on micro- and nanoscale devices. Logic Design of NanoICs builds a foundation for logic in nanodimensions and guides you in the design and analysis of nanoICs using CAD. The authors present data structures developed toward applications rather than a purely theoretical treatment.

Requiring only basic logic and circuits background, Logic Design of NanoICs draws connections between traditional approaches to design and modern design in nanodimensions. The book begins with an introduction to the directions and basic methodology of logic design at the nanoscale, then proceeds to nanotechnologies and CAD, graphical representation of switching functions and networks, word-level and linear word-level data structures, 3-D topologies based on hypercubes, multilevel circuit design, and fault-tolerant computation in hypercube-like structures. The authors propose design solutions and techniques, going beyond the underlying technology to provide more applied knowledge.

This design-oriented reference is written for engineers interested in developing the next generation of integrated circuitry, illustrating the discussion with approximately 250 figures and tables, 100 equations, 250 practical examples, and 100 problems. Each chapter concludes with a summary, references, and a suggested reading section.

### **From reader reviews:**

#### **Steven Page:**

The book Logic Design of NanoICS (Nano- and Microscience, Engineering, Technology and Medicine) can give more knowledge and information about everything you want. Why then must we leave a very important thing like a book Logic Design of NanoICS (Nano- and Microscience, Engineering, Technology and Medicine)? Several of you have a different opinion about e-book. But one aim in which book can give many details for us. It is absolutely right. Right now, try to closer together with your book. Knowledge or info that you take for that, you are able to give for each other; you can share all of these. Book Logic Design of NanoICS (Nano- and Microscience, Engineering, Technology and Medicine) has simple shape nevertheless, you know: it has great and massive function for you. You can appearance the enormous world by open and read a reserve. So it is very wonderful.

#### **Gerald Dews:**

A lot of people always spent their own free time to vacation or even go to the outside with them loved ones or their friend. Do you realize? Many a lot of people spent they will free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity honestly, that is look different you can read any book. It is really fun in your case. If you enjoy the book that you read you can spent 24 hours a day to reading a reserve. The book Logic Design of NanoICS (Nano- and Microscience, Engineering, Technology and Medicine) it is very good to read. There are a lot of individuals who recommended this book. We were holding enjoying reading this book. If you did not have enough space bringing this book you can buy typically the e-book. You can m0ore easily to read this book from a smart phone. The price is not very costly but this book has high quality.

#### **Linda Gabriel:**

People live in this new day of lifestyle always try to and must have the free time or they will get lot of stress from both way of life and work. So , when we ask do people have extra time, we will say absolutely sure. People is human not really a huge robot. Then we ask again, what kind of activity are there when the spare time coming to a person of course your answer can unlimited right. Then ever try this one, reading publications. It can be your alternative within spending your spare time, the book you have read will be Logic Design of NanoICS (Nano- and Microscience, Engineering, Technology and Medicine).

#### **Jami Hannah:**

You can get this Logic Design of NanoICS (Nano- and Microscience, Engineering, Technology and Medicine) by look at the bookstore or Mall. Merely viewing or reviewing it could to be your solve issue if you get difficulties on your knowledge. Kinds of this e-book are various. Not only simply by written or printed and also can you enjoy this book by e-book. In the modern era such as now, you just looking by your mobile phone and searching what their problem. Right now, choose your own ways to get more information

about your book. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose proper ways for you.
