The Geometry and Dynamics of Magnetic Monopoles (Princeton Legacy Library) Michael Francis Atiyah, Nigel Hitchin

Systems governed by non-linear differential equations are of fundamental importance in all branches of science, but our understanding of them is still extremely limited. In this book a particular system, describing the interaction of magnetic monopoles, is investigated in detail. The use of new geometrical methods produces a reasonably clear picture of the dynamics for slowly moving monopoles. This picture clarifies the important notion of solitons, which has attracted much attention in recent years. The soliton idea bridges the gap between the concepts of "fields" and "particles," and is here explored in a fully three-dimensional context. While the background and motivation for the work comes from physics, the presentation is mathematical.

This book is interdisciplinary and addresses concerns of theoretical physicists interested in elementary particles or general relativity and mathematicians working in analysis or geometry. The interaction between geometry and physics through non-linear partial differential equations is now at a very exciting stage, and the book is a contribution to this activity.

Originally published in 1988.

The **Princeton Legacy Library** uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These paperback editions preserve the original texts of these important books while presenting them in durable paperback editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

From reader reviews:

Jorge Raines:

What do you think of book? It is just for students because they're still students or the item for all people in the world, exactly what the best subject for that? Merely you can be answered for that problem above. Every person has distinct personality and hobby for every other. Don't to be compelled someone or something that they don't would like do that. You must know how great and also important the book The Geometry and Dynamics of Magnetic Monopoles (Princeton Legacy Library). All type of book would you see on many sources. You can look for the internet sources or other social media.

Annie Smith:

Information is provisions for those to get better life, information these days can get by anyone on everywhere. The information can be a understanding or any news even a problem. What people must be consider when those information which is inside former life are challenging be find than now could be taking seriously which one would work to believe or which one the actual resource are convinced. If you have the unstable resource then you buy it as your main information you will see huge disadvantage for you. All those possibilities will not happen inside you if you take The Geometry and Dynamics of Magnetic Monopoles (Princeton Legacy Library) as your daily resource information.

Pamela Watkins:

Do you have something that you enjoy such as book? The e-book lovers usually prefer to pick book like comic, quick story and the biggest some may be novel. Now, why not attempting The Geometry and Dynamics of Magnetic Monopoles (Princeton Legacy Library) that give your satisfaction preference will be satisfied by reading this book. Reading addiction all over the world can be said as the method for people to know world better then how they react to the world. It can't be stated constantly that reading habit only for the geeky man but for all of you who wants to always be success person. So , for all you who want to start reading through as your good habit, you are able to pick The Geometry and Dynamics of Magnetic Monopoles (Princeton Legacy Library) become your own personal starter.

Myron Mendez:

With this era which is the greater man or who has ability in doing something more are more important than other. Do you want to become one among it? It is just simple way to have that. What you are related is just spending your time almost no but quite enough to experience a look at some books. On the list of books in the top record in your reading list will be The Geometry and Dynamics of Magnetic Monopoles (Princeton Legacy Library). This book and that is qualified as The Hungry Inclines can get you closer in growing to be precious person. By looking way up and review this e-book you can get many advantages.
