Drop shipping is a fulfillment model that allows you to buy products individually from a wholesaler and ship them directly to your customer. Instead of purchasing a large amount of inventory, you simply partner with a drop shipping supplier and list their merchandise for sale. Then, once you receive an order you forward it to the supplier for fulfillment. The supplier will ship the product directly from their warehouse to your customer, and charge you only for the price of the shipped item.

Like all businesses, success and profitability rely on a number of variables. But when done correctly, it's possible to create highly profitable online businesses with drop shipping. Drop shipping isn't a magic formula – and real success takes significant work and time – but it's a viable online business model with very low risk.

This book is here to introduce you to the fascinating and lucrative world of dropshipping and help you along the way!
