What Will Work: Fighting Climate Change with Renewable Energy, Not Nuclear Power (ENVIRONMENTAL ETHICS AND SCIENCE POLICY SERIES) Kristin Shrader-Frechette

What Will Work makes a rigorous and compelling case that energy efficiencies and renewable energy -- and not nuclear fission or "clean coal" -- are the most effective, cheapest, and equitable solutions to the pressing problem of climate change.

Kristin Shrader-Frechette, a respected environmental ethicist and scientist, makes a damning case that the only reason that debate about climate change continues is because fossil-fuel interests pay non-experts to confuse the public. She then builds a comprehensive case against the argument made by many that nuclear fission is a viable solution to the problem, arguing that data on the viability of nuclear power has been misrepresented by the nuclear industry and its supporters. In particular she says that they present deeply flawed cases that nuclear produces low greenhouse gas emissions, that it is financially responsible, that it is safe, and that its risks do not fall mainly on the poor and vulnerable. She argues convincingly that these are all completely false assumptions.

Shrader-Frechette then shows that energy efficiency and renewable solutions meet all these requirements - in particular affordability, safety, and equitability. In the end, the cheapest, lowest-carbon, most-sustainable energy solutions also happen to be the most ethical.

This urgent book on the most pressing issue of our time will be of interest to anyone involved in environmental and energy policy.

From reader reviews:

Thomas Brim:

Here thing why this specific What Will Work: Fighting Climate Change with Renewable Energy, Not Nuclear Power (ENVIRONMENTAL ETHICS AND SCIENCE POLICY SERIES) are different and trustworthy to be yours. First of all reading through a book is good but it really depends in the content of it which is the content is as delicious as food or not. What Will Work: Fighting Climate Change with Renewable Energy, Not Nuclear Power (ENVIRONMENTAL ETHICS AND SCIENCE POLICY SERIES) giving you information deeper as different ways, you can find any e-book out there but there is no publication that similar with What Will Work: Fighting Climate Change with Renewable Energy, Not Nuclear Power (ENVIRONMENTAL ETHICS AND SCIENCE POLICY SERIES). It gives you thrill examining journey, its open up your own eyes about the thing which happened in the world which is maybe can be happened around you. You can easily bring everywhere like in park, café, or even in your technique home by train. In case you are having difficulties in bringing the imprinted book maybe the form of What Will Work: Fighting Climate Change with Renewable Energy, Not Nuclear Power (ENVIRONMENTAL ETHICS AND SCIENCE POLICY SERIES) in e-book can be your substitute.

Ella Nebel:

As a student exactly feel bored to be able to reading. If their teacher requested them to go to the library in order to make summary for some publication, they are complained. Just tiny students that has reading's soul or real their interest. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading really. Any students feel that studying is not important, boring in addition to can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this What Will Work: Fighting Climate Change with Renewable Energy, Not Nuclear Power (ENVIRONMENTAL ETHICS AND SCIENCE POLICY SERIES) can make you truly feel more interested to read.

Grant Rickard:

What is your hobby? Have you heard that will question when you got students? We believe that that problem was given by teacher for their students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person just like reading or as studying become their hobby. You have to know that reading is very important in addition to book as to be the factor. Book is important thing to increase you knowledge, except your teacher or lecturer. You find good news or update regarding something by book. Amount types of books that can you choose to use be your object. One of them is niagra What Will Work: Fighting Climate Change with Renewable Energy, Not Nuclear Power (ENVIRONMENTAL ETHICS AND SCIENCE POLICY SERIES).

Peter Christensen:

Some people said that they feel fed up when they reading a e-book. They are directly felt the item when they get a half portions of the book. You can choose the particular book What Will Work: Fighting Climate Change with Renewable Energy, Not Nuclear Power (ENVIRONMENTAL ETHICS AND SCIENCE POLICY SERIES) to make your personal reading is interesting. Your personal skill of reading talent is developing when you such as reading. Try to choose easy book to make you enjoy to read it and mingle the opinion about book and studying especially. It is to be initial opinion for you to like to open up a book and learn it. Beside that the book What Will Work: Fighting Climate Change with Renewable Energy, Not Nuclear Power (ENVIRONMENTAL ETHICS AND SCIENCE POLICY SERIES) can to be a newly purchased friend when you're feel alone and confuse with what must you're doing of this time.
