Most tasks involving the use of SAS revolve around data. The analyst is often responsible for bringing data into SAS, manipulating it so that it can be analyzed, as well as preparing the analysis itself. Although not all phases of data preparation are necessary for every project or task, the analyst must be ready for a wide variety of variations on the theme. *Data Preparation*, an excerpt from Art Carpenter's popular *Carpenter's Guide to Innovative SAS Techniques*, teaches you how to move, copy, import, export, and sort data. Other topics covered include the DATA step and table lookup techniques.
