A Monstrous Commotion: The Mysteries of Loch Ness Gareth Williams

The Loch Ness monster: a creature that should have died out with the dinosaurs or a legend built on hoaxes and wishful thinking?

Sir Peter Scott, internationally renowned naturalist and president of the World Wildlife Fund, was convinced that the monster existed. So were senior scientists at London's Natural History Museum and Chicago University; they lost their jobs because they refused to renounce their belief in the creature. For decades the scientific establishment was determined to quash attempts to investigate Loch Ness - until *Nature*, the world's greatest research journal, published an article by Peter Scott featuring underwater photographs of the monster.

Drawing extensively on new material, Gareth Williams takes a wholly original look at what really happened in Loch Ness. *A Monstrous Commotion* tells the story as never before: a gripping saga populated by colourful characters who do extraordinary things in pursuit of one of evolution's wildest cards.

Meticulously researched and dazzlingly written, this book will appeal to anyone fascinated by nature and its mysteries - and to everyone who enjoys a beautifully crafted detective story with a strong cast of heroes and villains, plenty of twists and an unexpected ending.

Read by Andrew Cullum and featuring a postscript narrated by the author.
