Why another book on investing? Because you think it's a lot harder than it actually is. Because investing scares you, and it shouldn't. Because you should be investing and you aren't. Because you're investing incorrectly and it's costing you a lot of money. Because the average savings of a 50-year old is \$43,000.

This book is for you if you want to invest correctly (and enough!), but have zero interest in the complex stuff. This book is also for you if you're ready to take action.

Once you've finished reading this book, you'll know more than most when it comes to investing. Most importantly, you'll know exactly what you need to do to invest successfully.
