In longitudinal studies it is often of interest to investigate how a marker that is repeatedly measured in time is associated with a time to an event of interest, e.g., prostate cancer studies where longitudinal PSA level measurements are collected in conjunction with the time-to-recurrence. Joint Models for Longitudinal and Time-to-Event Data: With Applications in R provides a full treatment of random effects joint models for longitudinal and time-to-event outcomes that can be utilized to analyze such data. The content is primarily explanatory, focusing on applications of joint modeling, but sufficient mathematical details are provided to facilitate understanding of the key features of these models. All illustrations put forward can be implemented in the R programming language via the freely available package JM written by the author. All the R code used in the book is available at: [jmr.r-forge.r-project.org/](http://jmr.r-forge.r-project.org/)

**From reader reviews:**

**Virginia Swain:**

Your reading sixth sense will not betray a person, why because this [(Joint Models of Longitudinal and Time-to-Event Data: With Applications in R)] [Author: Dimitris Rizopoulos] published on (July, 2012) publication written by well-known writer whose to say well how to make book which can be understand by anyone who else read the book. Written in good manner for you, still dripping wet every ideas and creating skill only for eliminate your own personal hunger then you still question [(Joint Models of Longitudinal and Time-to-Event Data: With Applications in R)] [Author: Dimitris Rizopoulos] published on (July, 2012) as good book not only by the cover but also by content. This is one guide that can break don't determine book by its protect, so do you still needing a different sixth sense to pick this kind of!? Oh come on your reading sixth sense already told you so why you have to listening to a different sixth sense.

**Michael Walker:**

The book untitled [(Joint Models of Longitudinal and Time-to-Event Data: With Applications in R)] [Author: Dimitris Rizopoulos] published on (July, 2012) contain a lot of information on the item. The writer explains your girlfriend idea with easy means. The language is very clear and understandable all the people, so do definitely not worry, you can easy to read the idea. The book was published by famous author. The author gives you in the new age of literary works. You can actually read this book because you can keep reading your smart phone, or product, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site in addition to order it. Have a nice study.

**Leslie Bergeron:**

You could spend your free time to study this book this e-book. This [(Joint Models of Longitudinal and Time-to-Event Data: With Applications in R)] [Author: Dimitris Rizopoulos] published on (July, 2012) is simple to deliver you can read it in the park your car, in the beach, train and soon. If you did not have much space to bring often the printed book, you can buy typically the e-book. It is make you much easier to read it. You can save typically the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

**Ruth Barr:**

Guide is one of source of information. We can add our information from it. Not only for students and also native or citizen want book to know the upgrade information of year in order to year. As we know those textbooks have many advantages. Beside we add our knowledge, also can bring us to around the world. By the book [(Joint Models of Longitudinal and Time-to-Event Data: With Applications in R)] [Author: Dimitris Rizopoulos] published on (July, 2012) we can consider more advantage. Don't you to be creative people? For being creative person must want to read a book. Just simply choose the best book that acceptable with your aim. Don't end up being doubt to change your life by this book [(Joint Models of Longitudinal and

Time-to-Event Data: With Applications in R) [Author: Dimitris Rizopoulos] published on (July, 2012). You can more pleasing than now.
