## Landscape, Seascape, and the Eco-Spatial Imagination (Routledge Interdisciplinary Perspectives on Literature)

Written from within the best traditions of ecocritical thought, this book provides a wide-ranging account of the spatial imagination of landscape and seascape in literary and cultural contexts from many regions of the world. It brings together essays by authors writing from within diverse cultural traditions, across historical periods from ancient Egypt to the postcolonial and postmodern present, and touches on an array of divergent theoretical interventions. The volume investigates how our spatial imaginations become "wired," looking at questions about mediation and exploring how various traditions compete for prominence in our spatial imagination. In what ways is personal experience inflected by prevailing cultural traditions of representation and interpretation? Can an individual maintain a unique and distinctive spatial imagination in the face of dominant trends in perception and interpretation? What are the environmental implications of how we see landscape? The book reviews how landscape is at once conceptual and perceptual, illuminating several important themes including the temporality of space, the mediations of place that form the response of an observer of a landscape, and the development of response in any single life from early, partial thoughts to more considered ideas in maturity. Chapters provide suggestive and culturally nuanced propositions from varying points of view on ancient and modern landscapes and seascapes and on how individuals or societies have arranged, conceptualized, or imagined circumambient space. Opening up issues of landscape, seascape, and spatiality, this volume commences a wide-ranging critical discussion that includes various approaches to literature, history and cultural studies. Bringing together research from diverse areas such as ecocriticism, landscape theory, colonial and postcolonial theory, hybridization theory, and East Asian Studies to provide a historicized and global account of our ecospatial imaginations, this book will be useful for scholars of landscape ecology, ecocriticism, physical and social geography, postcolonialism and postcolonial ecologies, comparative literary studies, and East Asian Studies.
