Bigfoots ARE The Locals. They live here. They were here before we humans showed up on the continent and they will likely outlast us. This is a 'bigfoot book' yet it probes much deeper than a simple treatment of the hackneyed question of 'Does Bigfoot exist?'. This book delves into such questions as why bigfoots exist, why they behave as they do, and why they have not yet been, and may never be dragged into the spotlight of science and the media. And don't look to 'science' for answers, because science is currently unequipped to shed any light on this profound anthropological mystery.
